---

**BID: CTC-15  
AGGREGATE HAULING**

**DUE: Thursday, February 14, 2019 @ 11:00am**

**ADDENDUM 1  
DATED: FEBRUARY 8, 2019**

The following questions have been submitted for clarification:

- 1) How many tons of material were hauled in the last year under the existing contract that is being replaced by CTC-15 AGGREGATE HAULING?  
**Answer:** The County does not have an existing or past contract for aggregate hauling.
- 2) Do you have a list of road names for the aggregate hauling bid CTC-15? **Answer:** NO.
- 3) What is the type of aggregate and the locations we will be hauling?  
**Answer:** See Section B. SCOPE OF WORK on page 3 of the bid package. Aggregate type could be any product from Martin Marietta in Cayce and delivery location could be any dirt road in Colleton County or the Public Works Department stock pile location.
- 4) I understand the delivery sites could be anywhere in the County. Has there been any thought to break up the County into sections or zones? Taking stone to Edisto Beach or Green Pond could be drastic cost difference verses the upper part of the County.  
**Answer:** See attached updated bid form. Provide additional price to be added to the per ton base bid for each mile greater than 95 miles from the quarry in Cayce to the County road location. Low bid will be based on bid line A. Price per ton for hauling aggregates per section B. SCOPE OF WORK.

I. BID FORMS

A. Price per ton for hauling aggregates per section B. SCOPE OF WORK: \$ \_\_\_\_\_ (per ton)

B. Price per ton for each mile greater than 95 miles from quarry to County road: \$ \_\_\_\_\_ (per mile)
